## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, and 9-18 are drawn to process of making, a fabricated mask and patterned film, classified in class 438, subclass 725.
- II. Claims 19 and 20-23, are drawn to product made, classified in class 428, subclass 810.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The process as claimed can be used to make other and materially different product such as a CMOS device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to James Oliff on August 30, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1765
